

The diagram illustrates an Open Programmability Environment (120). At the top, three boxes represent external services: "e-commerce 102", "VPN 104", and "Other Service 110", with an ellipsis between "VPN 104" and "Other Service 110". These services are connected to the environment via a horizontal line. Inside the environment box, a "Service Execution Environment 122" is connected to a "Directory 124" and a "Database 126" (represented as cylinders). Below the environment box, four triangles represent external servers: "Media Gateway 130", "Audio Server 132", "Application Server 134", and "Other Server 136", with an ellipsis between "Application Server 134" and "Other Server 136". Bidirectional arrows connect each of these servers to the bottom of the environment box. An arrow also points from the left side of the environment box to the "Service Execution Environment 122".
